

2021 DATES

## IMPACT OF ATTACHMENT DISRUPTION & DEVELOPMENTAL TRAUMA

Disruptions to a child’s attachment and experiences of trauma have detrimental and global effects on the developing child. It changes the way the child views themselves, adults and the world around them. This series of workshops scaffolds your learning and understanding of how disrupted attachment and trauma affects the child and their developing brain and their consequent challenges with behaviour and relationships. We will also explore and practice strategies to support your child, including the development of a personalised plan to help you help your child.
