

2021 Dates

Trauma and the Developing Brain

Early childhood experiences have a powerful role on early brain development. In this workshop, we will share how neglect, childhood trauma and adversity impact on brain development, and what we can do to promote healthy change and growth. This will be a hands-on and experiential workshop. To help with this learning, we will be playing the Brain Architecture Game, developed by the partnership of the National Scientific Council on the Developing Child (U.S.) and the Centre of the Developing Child – Harvard University.

Presenter:	Isabell Georgiou		
Venue:	Perth
